What is VISION 2050?

VISION 2050 is a way for YOU to influence the future of your community and Southeastern Wisconsin by helping us answer two main questions:

VISION 2050

One Region, Focusing on Our Future

FOLLOW US
@vision2050sewis
#vision2050

- How do you want your community and the Region to develop?
- How do you want to be connected to the places in your community and the Region where you live, work, and play?

These two questions are at the heart of VISION 2050—an effort of the Southeastern Wisconsin Regional Planning Commission to develop a year 2050 regional land use and transportation plan that will guide decision makers for years to come. The VISION 2050 process involves visioning for the future and looking at different scenarios that show how the future could look, with the ultimate goal of creating a shared long-range vision and plan.
